Address: 615 Pavonia Ave APT 1403, Jersey City, NJ 07306

EDUCATION

- **Carnegie Mellon University** Pittsburgh, PA
Master of Electrical And Computer Engineering, GPA: 3.92/4.00 May 2016
- **Harbin Institute of Technology** Harbin, China
Bachelor of Science, Communication Engineering, GPA: 87.78/100 June 2014

SKILLS

- **Programming Language** : Working with Scala and Java, hands on coding in Bash, project experience in Go and C.
- **Microservice Building** : Experienced in building microservice with Finagle, Zookeeper, Docker, Mesos, Nginx
- **Big Data ETL** : Real life work on data stream with Kafka. Experienced in ETL pipeline build with Scalding, Spark, Oozie, Sqoop. Familiar with big data storage like Hive/Impala, HDFS.
- **API Implementation** : Worked with both Play and Node.js. Relational database experience in MySQL and Postgre.
- **Agile Working** : Agile team experience including pair-coding, code review, test and validation in full lifecycle, etc.

EXPERIENCE

- **Squarespace, Inc** New York, NY
Software Engineer Feb. 2018 - Present
 - **Census Analytics** :
 - ◊ Working in Census analytics team building both front end and backend system for user data streaming, ETL, presentation and analysis.
- **Tapad Inc.** New York, NY
Software Engineer July 2016 - Feb. 2018
 - **Audience ETL Platform** :
 - ◊ Built and extended features of an automated target audience ETL platform from scratch.
 - ◊ Contributed in ETL and API design. Paired with frontend engineer on API implementation with Typed.js.
 - ◊ Integrated with 2 major partners and customize upload client with status logging, error and flow control feature.
 - ◊ Implemented sbt integration test in one command for API and wrapper client featuring docker compose.
 - **Tracked Event Streaming** :
 - ◊ Implemented a tracked event streaming pipeline from internal to external platforms with Kafka.
 - ◊ Built the notification mechanism from API to consumer for consumer in-memory map refreshing with Zookeeper.
 - **Analytics Report Generator** :
 - ◊ Built pipeline for hourly thirdparty data import and summarization with Hadoop, Oozie and Sqoop.
 - ◊ Dockerized VM-based report worker and API. Configured them in Mesos with service discovery through Nginx.
 - ◊ Implemented worker coordination mechanism using Zookeeper in case of Mesos instance failure and report loss.
 - **IP Look Up Service** :
 - ◊ Used Mesos, Finagle and Zookeeper to dockerize off-heap memory based service out of bidding system.
 - ◊ Implemented client side lazy evaluation and cache to minimize service QPS and latency to improve performance.
 - **Cross Screen Audience Experiment** :
 - ◊ Took full charge of whole ETL pipe-line design, implementation and performance validation.
 - ◊ Extracted data from AWS S3 and HDFS, transformed data and generated a graph based cross screen target audience with Scalding. Implemented data upload mechanism to thirdparty platform.
- **EEme, LLC** Pittsburgh, PA
Software Engineer, Part-time Intern Mar. 2016
 - **Analytics Frontend** :
 - ◊ Built an asynchronous file drag-drop upload feature with Ruby on Rails and deployed on Heroku. The feature included drag-drop, file validation, request to analytics engine and display analytic response in UI.
