Dear Recruiters,

I am interested in pursuing a new career opportunity, and happen to notice the job position Software Engineer listed on your website. The company and opportunity look like a great fit for me and I think my background also fits the job perfectly.

I have almost 2 years experience in industry, before I worked in Tapad, Inc as software engineer focusing on ad-tech. My work experience includes building and maintaining DSP platform, buliding reporting and analytics system, building targeting audience platform ,etc. And my tech stack includes Scala/Java, Hadoop/Scalding, Spark, Finagle, Kafka, Zookeeper and a lot of open source projects, which is a perfect fit for the tech-stack in FourSquare. I am very interested in joining FourSquare because the technology used, and the location based service and advertising is my favorite, and I think it is the future of industry.

I want to request a chance to interview with FourSquare and get an opportunity to know more about the business, technology ,etc, and present my work and experience. My cell number is 412-419-4227 and my email address is lipei.work@gmail.com. Feel free to reach out to me. Thank you!

Sincerely yours,

Li Pei
